

Next-gen Blockchain Dashboards.

The Vulkania app allows your project to generate a cryptocurrency tracking dashboard in only a few clicks.

Complete with a stylish and user-friendly interface, your fully customizable dashboard houses all the data you and your community needs to track your token while providing you the power to manage key statistics.

Keep control of your data

Set up and customize your dashboard with a comprehensive and easy-to-use administration interface.

You are in control of your data!

Customize the theme and colors of your dashboard

Keep control of the data that is displayed (supply, description, links...)

Highlight the wallets your community need to follow

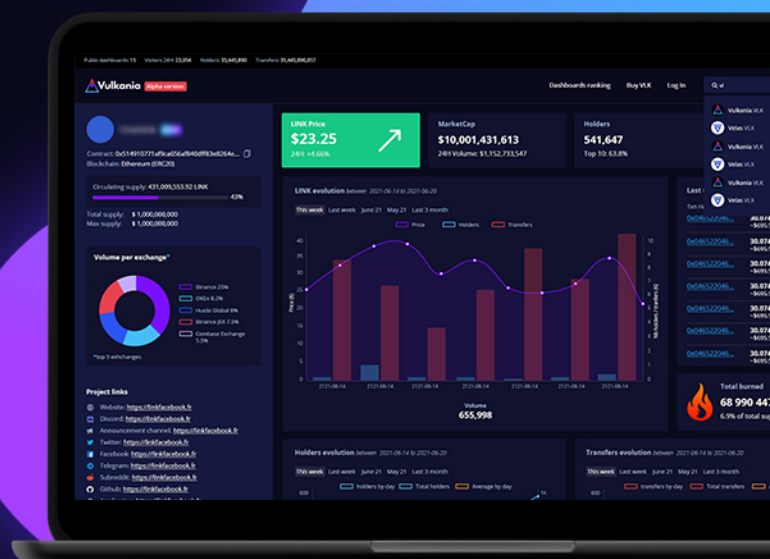

Create charts specific to your project data

Promote your coin

Share your dashboard with your community via your preferred channels.

Compete against other dashboards via various metrics.

Forget market cap, Vulkania Rank™ is based on daily visits to your dashboard.

What we offer

We love your project and would like to partner with you by offering you the dashboard for free. You will have control over your data and be able to share it with your community.

- ✓ Free dashboard for your project
- ✓ Spotlight on your project for the launch on our Twitter & Telegram
- ✓ Included in the Vulkania Ranking
- ✓ Your project introduced and promoted to our community

What we need from you

In exchange for this amazing and free dashboard, we ask you to share your dashboard and communicate about the project and our partnership:

- ✓ A tweet regarding your project's listing on Vulkania.io
- ✓ The creation of a /dashboard command in your Telegram channel
- ✓ A backlink from your main website to your Vulkania Dashboard
- ✓ Like, Retweet and Comment the tweets that mention you
